

Design Thinking in the Classroom
Dr. J. Hammond

Assignment 5:

1. Describe your prototype and attach it (via link, image, photo, document, whatever is applicable). If you have more than one, describe and attach them.
2. How did the prototyping process go? What did you learn from it that you might be able to apply to the classroom? What kind of structures might you put in place to help the prototyping process be most productive in your classroom?
